

MENANYA MORRIS

FULL-STACK WEB DEVELOPER

emmiemenz@gmail.com | [GitHub](#) | [LinkedIn](#) | [Twitter](#) | [AngelList](#) | [Portfolio](#)

SUMMARY

I am a versatile **Full Stack and Mobile Developer** with over 5 years of experience and a strong background in **Mechanical Engineering**. By combining engineering principles with modern web and mobile development expertise, I take a structured and analytical approach to solving complex technical challenges. I specialize in building **scalable, high-performing, and user-focused applications** across platforms. Passionate about innovation, I stay ahead of emerging technologies and consistently deliver **impactful, high-quality solutions** that solve real-world problems and drive measurable results.

SKILLS

Front-End: JavaScript, React Native, NextJS, ReactJS, Redux, Typescript, WordPress

Back-End: Ruby(Ruby on Rails), Java(Spring boot & android dev), NodeJs-ExpressJs, MongoDB, Postgres, Java, C++

Tools & Methods: AWS, Git, GitHub, Docker, Heroku, Netlify, Mobile/Responsive Development, RSpec, TDD, Chrome Dev Tools

Professional: Remote Pair-Programming, Teamwork, Mentoring, critical thinking, problem-solving, time management

Recent Works include:

Melisports e-commerce - This is an e-commerce app for a store where users can view and purchase tennis equipment and apparel using the Stripe payment gateway. Products are categorised according to their professional level for easier sorting and a more user-friendly experience. | [repo](#)

- **Built with:** ReactJS and Redux for the Front end, while using Ruby on Rails for the server side, alongside a Postgres database

Bitbridge Global - A wallet-based web/mobile application facilitating seamless cryptocurrency transactions and digital asset management, and also provides utility bills payment seamlessly using a system. Built with modern web technologies, it integrates secure authentication, intuitive UI/UX, and real-time data updates to enhance the user experience.

- **Built with:** React, React Native, Typescript, Redux-Toolkit, Tailwindcss, SCSS

Apolop2p - APOLO P2P is redefining blockchain education by cutting through the noise of scams and misinformation to deliver clear, practical knowledge from verified experts. With interactive learning tools and seamless fiat/crypto payments, the platform makes blockchain education accessible, engaging, and genuinely useful for learners of all levels.

- **Built with:** React, Typescript, Redux-Toolkit,

Artisan-Directory - ArtisanHub aims to revolutionise the way artisans and clients connect and collaborate, fostering a thriving ecosystem of skilled professionals and satisfied customers within Nasarawa State. Whether you need a skilled artisan or are looking to showcase your craftsmanship, ArtisanHub is your go-to destination. | [repo](#)

- **Built with:** React, Typescript, Redux-Toolkit, Tailwindcss

EXPERIENCE

APOLO P2P – Frontend Developer

Remote
April 2025 – Present

- As a front-end developer at APOLO P2P, I contributed to building a blockchain education platform by developing responsive user interfaces, implementing interactive learning modules, and integrating fiat/crypto payment systems. I worked closely with designers and backend engineers to ensure smooth API integrations, optimised performance, and a seamless user experience. My role also involved maintaining scalable code using React, TypeScript, Redux Toolkit, and TailwindCSS while troubleshooting and refining features to enhance platform reliability and usability.

Amp Agency– Frontend developer

Remote
August 2024 – January 2025

As a front-end developer at AMP Agency, I built several landing pages and optimised user dashboards and integrated APIs, as well as worked with third-party services to ensure seamless functionality and responsiveness across devices. I collaborated with teams to implement designs and troubleshoot front-end issues efficiently.

ZIRU VENTURES– FullStack developer,

Remote
January 2023 – August 2024

My responsibilities include building and maintaining back-end functionality using Ruby on Rails, configuring servers, managing databases, and integrating APIs for seamless data communication. Additionally, I ensure the application's architecture is optimized for security, reliability, and scalability across all layers of development.

MELISPORTS – FullStack developer,

Remote
March 2020 – Dec 2022

- Designed and developed 4+ user interfaces for web applications while ensuring they are visually appealing, user-friendly, and responsive across different devices
- Designed and implemented database schemas, wrote queries and ensured efficient data storage, retrieval, and management.
- Made decisions with team members about the selection of appropriate technologies, frameworks, and infrastructure to meet project requirements and scalability needs. Also ensured that the front-end and back-end components work seamlessly together.
- Defined API endpoints, implemented authentication and authorisation mechanisms, and ensured the security and performance of the API for several applications.
- was able to deploy applications to production environments, manage version control systems, and configure build and deployment processes

MICROVERSE
Mentor (Volunteer)

Remote
Sept 2020 – July 2021

- Mentored 2 junior developers, providing technical support through code reviews.
- Proposed improvements to code organisation to boost code quality and overall performance, resulting in a 5% decrease in the long-term cost of maintenance and bug fixes.
- Provided advice and tips on maintaining motivation to maintain longevity in the program, enhancing student retention by 3% from the previous year.
- Trained and mentored 3 kids in JavaScript and guided them to 20 projects.

EDUCATION

MICROVERSE

March 2022 – July 2022

Remote Full-stack Web Development Program, Full-Time

- Mastered intermediate and advanced topics in full-stack development (including Rails, Git, and DS&A challenges) while building 10+ full-stack projects independently and via pair programming.
- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux. Developed skills in remote pair programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.

UNIVERSITY OF NIGERIA

Mechanical Engineering

September 2011 – July 2016

- Microscopic Analysis on the Effect of Various Machining or Cutting Processes on Glass Fibre Reinforced Plastics.
- Design and Development of a Road Bicycle.
